# Stainless Steel Parallel Clamps

## Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Permanent fiber laser identification eliminates contamination risks and maintains traceability without surface marring.
- Type 316 stainless steel nut and bolt included.
- Heavy duty construction maintains alignment and support under vibration and mechanical stress.

## Applications

- RMC's type 316 stainless steel Parallel Clamps are engineered for secure, corrosion resistant support of stainless steel or PVC-coated conduit. Designed to fasten conduit runs parallel to the flange of I-beams, channels, or other structural members, these clamps eliminate the need for drilling holes, preserving structural integrity and reducing installation time.
- Manufactured from type 316 stainless steel, they deliver superior strength and long-term durability in harsh or sanitary environments, including food & beverage, chemical processing, and outdoor industrial applications..

## Material

- Body: Type 316 Stainless Steel
- Nut and Bolt: Type 316 Stainless Steel

## Certifications

- UL/cUL 2239 Listed
- UL File # E516500
- ASTM A743
- RoHS compliant
- REACH compliant
