

# Stainless Steel Right-Angle Beam Clamp

## Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Designed to fit standard 1-5/8" stainless steel strut channels.
- Precision cut UNC threads for reliable fit and consistent performance.
- Heavy-duty design provides a stable base for strut/channel framing, ensuring long-term reliability of conduit and equipment supports.

## Applications

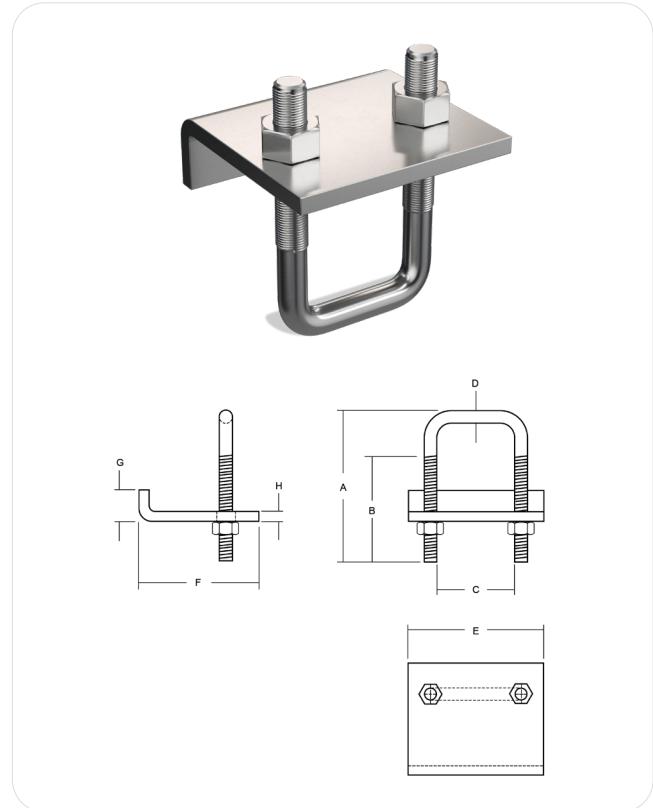

- RMC'S type 316 Stainless Steel Right Angle Beam Clamps provide a secure, corrosion-resistant method of fastening stainless steel conduit or strut to beams, channels, flanges, or other angled structural members.
- Designed for upright or lateral support, these clamps eliminate the need for drilling and preserve structural integrity while ensuring reliable alignment of conduit runs and strut frameworks.

## Material

- Body: Type 316 Stainless Steel
- Nuts and Bolt: Type 316 Stainless Steel

## Certifications

- ASTM A240
- RoHS compliant
- REACH compliant
