Stainless Steel Rod Coupling

Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Precision cut threads meet ANSI B1.1 UNC Class 2 coarse series for reliable fit and consistent performance.
- Superior durability with robust load capacity

Applications

- RMC's type 316 stainless steel Rod Couplings are designed to join two lengths of threaded rod, providing a secure and durable connection in structural and industrial assemblies.

Material

- Body: Type 316 Stainless Steel

Certifications

- ASTM F593
- RoHS compliant
- REACH compliant
