

Stainless Steel Strut Clamps

Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Produced with high polished finish and mechanical strength designed to withstand vibration, impact, and harsh conditions without compromising integrity.
- Permanent fiber laser identification eliminates contamination risks and maintains traceability without surface marring.
- Type 316 stainless steel nut and bolt included.

Applications

- RMC's type 316 stainless steel Strut Clamps are designed for use with standard 1-5/8" channels. They can be installed at any point along the slot side of the channel by engaging the two channel returns, and are supplied complete with stainless steel nut and bolt for secure fastening.
- These two-piece clamps provide reliable support for conduit or pipe and are suitable for both vertical and horizontal runs. Their stainless steel construction ensures durability and corrosion resistance in demanding environments.

Material

- Body: Type 316 Stainless Steel
- Nut and Bolt: Type 316 Stainless Steel

Certifications

- ASTM A743
- RoHS compliant
- REACH compliant
