Stainless Steel Two Hole Straps

Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Permanent fiber laser identification eliminates contamination risks and maintains traceability without surface marring.
- Heavy-gauge stainless steel construction maintains shape and support under mechanical stress.

Applications

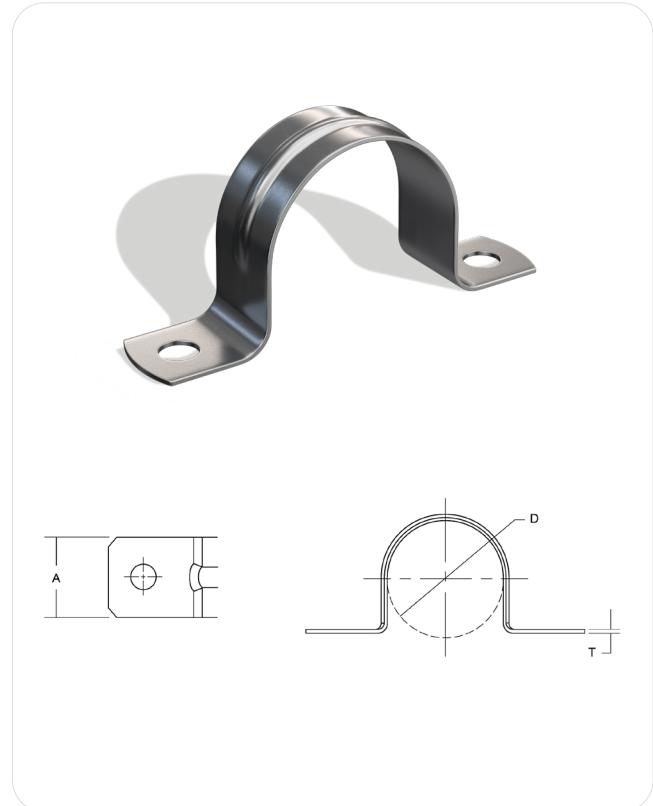

- RMC's type 316 stainless steel Two Hole Straps are built for heavy-duty performance, providing secure support and mounting of stainless steel Rigid Conduit to multiple structural members and flat surfaces in corrosive or demanding environments.

Material

- Body: Type 316 Stainless Steel

Certifications

- UL/cUL 2239 Listed
- UL File # E516500
- RoHS compliant
- REACH compliant
