

Project _____ Phone _____ Date _____

Company _____ Location _____

Stainless Steel U-Bolts

Features and Benefits

- Manufactured in 316 stainless steel for superior corrosion resistance, exceptional strength, and outstanding performance in harsh environments.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Precision UNC threaded legs with smooth U-shape curvature for secure conduit clamping.
- High tensile strength and load-bearing capacity for industrial installations.

Applications

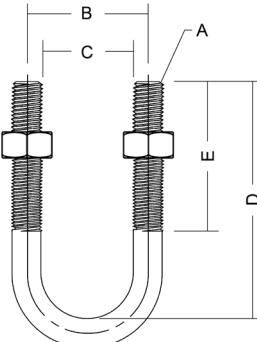

- RMC's type 316 stainless steel U-Bolts deliver reliable support for mounting stainless steel conduit or pipe, ensuring strength and corrosion resistance in demanding environments.

Material

- Body: Type 316 Stainless Steel
- Nuts: Type 316 Stainless Steel

Certifications

- UL/cUL 2239 Listed
- UL File # E516500
- RoHS compliant
- REACH compliant

Part Number	Trade Size	A	B	C	D	E	WT/PC (lbs.)
