Company _____ Location _____

Stainless Steel Threaded Rod

Features and Benefits

- Manufactured in 304 and 316 stainless steel alloys.
- Delivers exceptional corrosion resistance, mechanical strength, and temperature performance up to 1600°F.
- Hygienic polished surface improves cleanability, resists microbial buildup, and delivers a consistent, professional appearance.
- Thread Types: Coarse, UN-8, National Fine (SAE).
- Available in 6' lengths.

Applications

- RMC's stainless steel threaded rod is designed to provide reliable means for hanging and supporting electrical conduit, strut, piping, and mechanical systems in corrosive or demanding environments.

Certifications

- ASTM A193 gr B8 / B8M Class 1
- RoHS compliant
- REACH compliant

Part Number 304	Part Number 316	Thread Size	Pitch (Threads per inch)	Length (ft.)	Design Lead	Weight/ea. (lbs).
